

Key	Parent key	Type	Details	Example Format
similarity_percentage	NA, part of output dictionary	int or float	The overall similarity percentage between the two traces. Higher of similarity_percentage from keys similarity_info_trace_1_to_2 and similarity_info_trace_2_to_1 in metadata.	89.21792
metadata	NA, part of output dictionary	dict	Contains similarity information of individual traces.	{'similarity_info_trace_1_to_2': { 'similarity_percentage': 71.79456, 'overlapping_pings_indices': [[52, 0], [53, 4], [54, 4], [57, 4]] }, 'similarity_info_trace_2_to_1': { 'similarity_percentage': 76.41254, 'overlapping_pings_indices': [[0, 52], [1, 52], [2, 52], [3, 52], [5, 54]] } }
similarity_info_trace_1_to_2	metadata	dict	Contains similarity information of first trace. Similarity of trace_1 with respect to trace_2	{ 'similarity_percentage': 71.79456, 'overlapping_pings_indices': [[52, 0], [53, 4], [54, 4], [57, 4]] } }
similarity_info_trace_2_to_1	metadata	dict	Contains similarity information of second trace. Similarity of trace_2 with respect to trace_1	{ 'similarity_percentage': 76.41254, 'overlapping_pings_indices': [[0, 52], [1, 52], [2, 52], [3, 52], [5, 54]] } }
similarity_percentage	similarity_info_trace_1_to_2	int or float	Similarity percentage of trace_1 with respect to trace_2	81.21719
overlapping_pings_indices	similarity_info_trace_1_to_2	list	A list of of indices from trace_1 and trace_2, for those pings in trace_1 that have overlapping ping in trace_2. It will be empty if there is no overlap of trace_1 with respect to trace_2. Each index pair is a list in format: [index_of_ping_from_trace_1, index_of_corresponding_overlapping_ping_from_trace_2]	[[52, 0], [53, 4], [54, 4], [57, 4]]
similarity_percentage	similarity_info_trace_2_to_1	int or float	Similarity percentage of trace_1 with respect to trace_2	89.21792
overlapping_pings_indices	similarity_info_trace_2_to_1	list	A list of of indices from trace_2 and trace_1, for those pings in trace_2 that have overlapping ping in trace_1. It will be empty if there is no overlap of trace_2 with respect to trace_1. Each index pair is a list in format: [index_of_ping_from_trace_2, index_of_corresponding_overlapping_ping_from_trace_1]	[[0, 52], [1, 52], [2, 52], [3, 52], [5, 54]]
plot	NA, part of output dictionary	Dual Map of folium. plugins.DualMap class or None	A folium map visualization of the traces, if plot_map argument in input is True. Otherwise, None.	None
